

PNEUMATIC YARN SPLICER

P020

PAWAN BANDH P020 is a simple manual device for joining filament yarn. Yarn can be spliced by inserting the yarns in a chamber & introducing blast of compressed air by pressing a lever. Air injection time to suit the yarn size. tail ends are cut manually.

PAWAN BANDH P020

APPLICATION
POY YARN

| SUITABLE FOR | YARN RANGE |
|---------------|---------------|
| 1 : SYNTHETIC | 20 - 500 dtex |

SPECIFICATION

APPLICATION FIELD : DTY / DTEX
 OPERATING PRESSURE : 2 - 6bar (kg/cm²)
 YARN COUNT POSSIBILITIES : 500 (tpm)
 WORKING PRINCIPLE : TWISTING
 OVERALL DIMENSION : 135 X 60 X 20 mm
 AIR CONNECTION : 8 mm OD PNEUMATIC PIPE
 WORKING METHOD : MANUAL
 WEIGHT : 200 gms
